

PacStarTM Federal Partners

PacStar is a technology-based system integrator that provides full communications solutions to our military and government customers worldwide. PacStar holds its own GSA schedule and is an authorized teaming agent for a variety of network centric manufacturers, allowing us to supply federal agencies with top quality communications products and services at competitive prices. Our global presence ensures clients can count on our technical team to provide an immediate personal response with innovative solutions that meet their complex engineering requirements.

PacStar specializes in advanced communications products, network design and implementation of secure wireless, VoIP, and switching and routing solutions. Our engineers are fully trained and hold professional-level certificates for all of our major product lines including Adtran, Aruba, Cisco, Enterasys, Brocade, Fortress, Proxim, and Sphere. In addition, we provide certified engineering services in the areas of project management, network security, and training.

Why Choose PacStar?

- Responsive, Technically Knowledgeable Team
- Experienced Government Provider
- Multiple Contracting Vehicles
- Certified Design, Integration, and Installation Services
- Worldwide Delivery and Support
